

CLIENT TESTIMONIAL

"...A difficult job handled, in my opinion, as well as I have ever had a precast job go...The product and the quality of erection are of a very high standard, and all [of] our clients are pleased."

Mike Smith

Senior Superintendent - TSU Bobcats Stadium Expansion
Austin Commercial

"I would like to thank you and your dedicated staff for the hard work and the exceptional precast product NAPCO provided for the Bobcat Stadium expansion. The delivery of your product was critical to maintaining an unprecedented fast-track schedule and NAPCO met each and every deadline... Your team's collaborative efforts with the architect, structural engineer, contractor and owner were instrumental in the success of this project."

Terry N. Whitman

Project Manager , TSU Bobcats Stadium Expansion

NAPCO

P R E C A S T

NAPCO's team of engineers, draftsmen, project managers, and sales people work closely with architects, engineers, and general contractors to ensure that *what is envisioned is achieved*.

"In Budget... On Time"

▲ KATY ISD MULTI-PURPOSE COMPLEX
Architect: PBK Architects, Inc.

ADAPTABILITY

Whether constructing a new facility such as the Laredo Entertainment Center (below) or adding directly onto an existing facility such as the UT Memorial Stadium East Grandstand Expansion (above), NAPCO provides solutions for almost any need.

EFFICIENCY

Site-cast concrete is more susceptible to weather conditions and delays than precast concrete which is poured and inspected prior to being shipped for erection. As on Tom Killbaugh Stadium (center page) an entire section of risers can be erected in a single day.

▼ TOM KIMBROUGH STADIUM
Architect: PBK Architects, Inc.

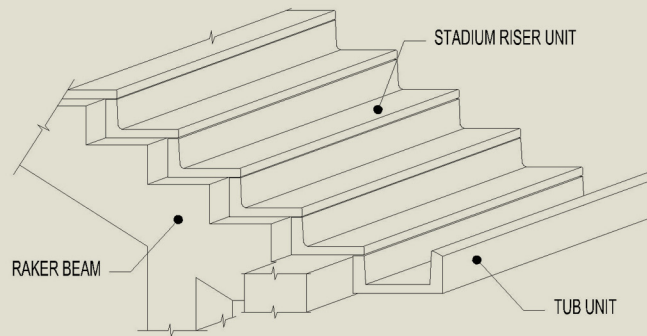

VERSATILITY

From sports arenas (above) to entertainment complexes, from baseball (front cover) and softball stadiums to football stadiums; NAPCO has the ability to produce and erect a variety of Sports and Entertainment Complexes.

CAPABILITY

NAPCO can provide all the major components to build entire Sports and Entertainment Complexes. On Texas State University's Bobcat Stadium (below), NAPCO not only produced the risers, raker beams, slabs, stairs, and interior walls; we also supplied the columns, box beams, brick veneer panels, and architectural sand-blasted panels.

▼ LAREDO ENTERTAINMENT CENTER
Architect: LAN, Inc.
